REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **30-38** are allowable over the prior art of record because the prior art does not teach or suggest an apparatus for electrodeposited film formation comprising an electrolyte solution bath and a mode-locked laser whose pulse width is less than a picosecond.

The prior art does not contain any language that teaches or suggests the above. *Melcher et al.* do not teach a mode-locked laser. Mode-locking inherently creates pulses of picoseconds. The fact that Melcher utilizes a chopper to get pulsing indicates that the continuous multimode or single mode argon laser (col. 3, lines 40-44) is not the same thing as mode-locking. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Claims **39-46** are allowable over the prior art of record because the prior art does not teach or suggest an apparatus for electrodeposited film formation comprising an electrolyte solution bath and a pulse laser with an electric field in the order of tens of GW/cm^2 and whose pulse width is less than a picosecond.

The prior art does not contain any language that teaches or suggests the above. *Melcher et al.* do not teach a pulse laser with an electric field in the order of tens of GW/cm^2 . *Melcher et al.* teach an intensity preferably between about 10^2 to $10^6 \text{ W}/\text{cm}^2$ (col. 3, lines 48-50). Therefore, a person skilled in the art would not have been

motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
